PROPOSAL: The Louisville District, Army Corps of Engineers (District), proposes to update the existing mailing list used for the distribution of Public Notices for projects requiring Corps Individual Permits.

BACKGROUND: The Army Corps of Engineers is required by Federal regulation to publish Public Notices for permit applications for Individual Permits in order to solicit public comments. The required contents of these Public Notices and distribution procedures are described in the Code of Federal Regulations at 33 CFR 325.3. Currently, the Public Notices are posted on the District's regulatory web page. No specialized computer hardware or software is needed to view these Public Notices, other than that required to obtain access to the Internet.

Once a Public Notice is posted, an electronic mail notification is sent, announcing its availability for viewing. Anyone who provides us his or her E-mail address will receive the notification. We recommend that you receive this E-mail notification rather than a hard copy of the Public Notice to allow you continuous access to the Public Notice via our web page and to eliminate paper waste used to print the hard copies. E-mail notification is based on the projects located in the States in which you are interested. For example, if your interest is only for projects in Kentucky, please specify Kentucky only. Since the Louisville District covers parts of Kentucky, Illinois, Indiana and Ohio, please specify one of more States in which you wish to receive Public Notices. **Please check your choices on the attached form.**

If you do not have access to the Internet, or would like to continue receiving hard copies of the Public Notices, please check the Hard Copy option on the form. Since adjacent property owners may not have reason to suspect that a project is proposed nearby unless we notify them directly, we will continue our current practice of mailing them hard copies of the Public Notice.

COMMENTING: Please respond to this Public Notice by completing the enclosed form and sending it to:
